the lens aperture or f-stop is simply the diameter of the lens opening expressed as a fraction of its focal length.

it would then hum quietly to itself for several minutes and excrete the digested plasma out of its anus into a plastic cylinder hung by the side of the white box.

i agree that we moved really fast in our relationship as we dated for only 4 months before we decided to get married, and found out she was pregnant while doing wedding plans.

the r6300 is the first 802.11ac router from netgear.
